PROFESSIONAL SUMMARY

Dedicated Full Stack Developer and Computer Science undergraduate building clean, scalable web applications with the MERN ecosystem and TypeScript. Manage the complete Software Development Life Cycle (SDLC), turning complex problems into practical, real-world solutions—including secure civic technology platforms and media streaming applications. Connect Node.js RESTful APIs and MongoDB with responsive React.js frontends to deliver highly usable digital experiences.

EDUCATION

- Bachelor of Science in Computer Science 2023 – 2026
Government Arts College | Coimbatore, Tamil Nadu
CGPA: 7.8 / 10
- Higher Secondary Education (HSC) 2021 – 2023
Government Higher Secondary School | Ariyalur, Tamil Nadu
Percentage: 77.5%

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, Java, C++
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Shadcn UI
- **Backend:** Node.js, Express.js, RESTful APIs
- **Databases:** MongoDB(NoSQL), MySQL, Mongoose ODM
- **Tools & Cloud:** Git, GitHub, VS Code, Vercel, Render, Cloudinary, Upstash Redis

PROJECT EXPERIENCE

CityLink – Civic Issue Reporting Platform | Live: citylink-tn.vercel.app

- Built a full-stack civic issue reporting platform enabling citizens to easily log municipal problems with location pinning and duplicate detection.
- Developed a secure, role-based Node.js and MongoDB backend utilizing RESTful APIs to manage high-volume ticketing and administrative workflows.

Adfrio – Ad-Free Media Streaming Application | Live: adfrio.vercel.app

- Created an ad-free multimedia streaming application designed to deliver reliable audio and video playback by integrating external media sources.
- Improved backend performance and secure user session management by implementing a Node.js architecture integrated with Upstash Redis and Google OAuth 2.0.

CERTIFICATIONS

- **Object Oriented Programming using Python**
Infosys Springboard | September 2024
